# How to use this day pack

## What is in this pack

One zip = one day = everything you post that day. Nothing publishes itself; every row stays Draft until you schedule it.

## 1. Open 00_DAY_SHEET.md first

It lists all 46 placements in time order: what posts, where, at what time, which file to attach, which caption to paste, and whether the platform AI label goes on.

## 2. File names already carry the order

Every file in assets/ is named HHMM_POSTID_position-of-total. 0700_..._3of5.jpg is the 07:00 post, slide 3 of 5. Sort the folder by name and it is in posting order.

## 3. Carousels: attach in the numbered order

Select the file ending _1of5 first, then _2of5, and so on. Instagram, TikTok photo posts and Facebook keep the order you select them in. 04_CAROUSELS.md says what each slide is for.

## 4. Check the arrangement with your eyes

The pages after this one show every carousel and story as numbered thumbnails, side by side. If the numbers read 1, 2, 3, 4, 5 you are right.

## 5. Stories and videos

Stories are three frames, _1of3 then _2of3 then _3of3. Videos are one MP4 each: upload as is, no editing.

## 6. Before any video slot

Read the Video status section at the bottom of the day sheet. If a slot says POSTER ONLY - hold this slot, skip it today; the day is re-uploaded when its video lands.

## 7. LinkedIn

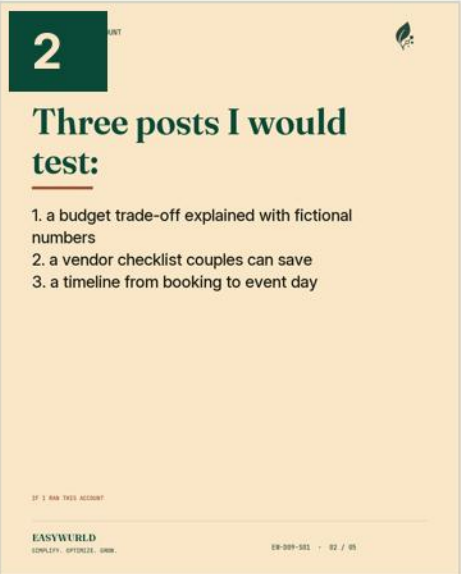

01_LINKEDIN.md holds the seven posts: four on the company page, three on the personal profile. Paste the body exactly, then post the first comment. Links go in the first comment only.

# 07:00 · EW-D09-S01 · carousel, 5 slides

If I ran a event planner account in Lagos | attach in this order:
0700_EW-D09-S01_1of5.jpg → 0700_EW-D09-S01_5of5.jpg

**1 of 5**
0700_EW-D09-S01_1of5.jpg
