INTERNAL MASTER DOCUMENT — NOT FOR CLIENTS

The Easywurld Business Playbook

The brand, the products, the prices, the plan, and the rules that keep all three honest.

Version 2.0 · October 2026

THE BUSINESS IN ONE PAGE

01

Who we are

Easywurld is an independent digital studio in Lagos, Nigeria. We give small businesses marketing clarity: they should be able to explain what they sell, to whom, in language a stranger understands, and then have the website and the chat system that delivers it.

Simplify. Optimize. Grow.

The slogan is not decoration. It is the order of operations: you cannot optimise a muddle, and you cannot grow what you have not simplified.

The promise, in one line

We turn a business that is hard to understand into one that is easy to buy from.

> We are not a content agency, and we are not a cheap-website shop. We sell clarity, and we sell it twice: once as a ₦5,000 pack you do yourself, and once as a ₦150,000+ build we do for you.

What we actually sell

Layer	What it is	Price	Role in the business
Packs	Nine DIY systems, delivered instantly	₦5,000	The first yes. The receipt.
Projects	Websites, landing pages, e-commerce	₦150k–₦650k	The actual money.
Care	Hosting, updates, backups, edits	₦25k/month	The recurring base.
Space	Community + studio	₦2k–₦15k/month	Month 3+, only after proof.

What we do not do

— No guaranteed results. We do not promise sales, rankings, or income. Any copy that does is a bug.

— No invented proof. Every non-client build is labelled concept project · sample build.

— No bundling by default. Each pack stands alone. The bundle is an upgrade, never the entry.

— No begging for engagement. No follow-for-follow, no pods, no bought followers.

— No work we cannot support. If we cannot maintain it for ₦25,000/month, we do not build it.

WHO WE ARE TALKING TO

02

The market and the customer

Our buyer is a Lagos small-business owner doing ₦300,000–₦5m a month, selling through WhatsApp, Instagram DMs and word of mouth. They are not short of effort. They are short of

system. They answer every message themselves, between doing the actual work.

The four pains that actually open a wallet

Pain	What it sounds like	What they buy first
The silent chat	“They asked the price and disappeared.”	Chat-to-Customer Playbook
The invisible website	“People land on my site and don’t message.”	Clear Homepage Blueprint
The mood-based posting	“I post when I remember.”	30-Day Content Engine
The invisible business	“Nobody nearby knows I exist.”	Lagos Local Visibility Starter

Buying triggers — the moments that make someone act

— A big enquiry went cold and it cost them real money.

— A competitor launched a cleaner site and started showing up first.

— They paid for ads and got nothing back.

— A corporate client asked for a website and they had nothing to send.

— December or January: the two moments a Nigerian owner reconsiders everything.

Who we are not for

Enterprise buyers with procurement committees. Businesses that want the cheapest possible website. Anyone who wants results guaranteed before they will pay. These are not bad people — they are simply not our buyer, and chasing them costs more than it returns.

> Our edge is not price and it is not speed. It is that we explain things plainly. Every asset, every page, every message should sound like a competent friend, not a brochure.

WHAT WE SELL, AND IN WHAT ORDER

03

The nine offers, and the ladder

Nine standalone packs, three flagship, five projects, one care plan, one community. Every pack is complete on its own: a buyer can take one, use it, never speak to us again, and still have got their money's worth. That is the rule that makes the rest work.

The ladder

POST (free) → PACK (₦5,000) → PROJECT (₦150k–₦650k) → CARE (₦25k/mo) → SPACE (community)

No post is a dead end. No rung is skipped. Each rung names the next one, once, without pressure.

The nine packs

#	Pack	Keyword	Owns this problem	Tier
1	Chat-to-Customer Playbook	PLAYBOOK	Enquiries that go quiet	A
2	Clear Homepage Blueprint	CLEAR	A homepage that explains nothing	A
3	One-Offer Landing Page Kit	PAGE	No page that gets replies	A
4	30-Day Content Engine	ENGINE	Posting that depends on mood	B
5	Lagos Local Visibility Starter	LOCAL	Being invisible nearby	B
6	Website Launch & Care Handbook	LAUNCH	A site that rots after launch	B
7	Everyday AI Prompt Desk	PROMPTS	AI output nobody checks	B
8	Clear Message Workbook	MESSAGE	Words that don't sound like you	C
9	Proposal & Report Templates	TEMPLATES	Proposals that take 3 days	C

Tier A gets 60% of offer slots, B 30%, C 10%. Nine equal launches is nine half-launches. All nine stay sellable; only the airtime is weighted.

The projects — published, not quoted

Project	Price	Delivery	What is included
Landing Page	₦150,000	5–7 days	1 page · copy + build · WhatsApp button
Business Website	₦300,000	2–3 weeks	Up to 5 pages · mobile-first · form · on-page SEO
Website + SEO setup	₦450,000	3–4 weeks	Keywords · titles · Search Console · GA4
E-commerce / catalogue	₦650,000+	4–6 weeks	Paystack · catalogue · order flow
Monthly Care	₦25,000/mo	Ongoing	Hosting · updates · backups · 2 edits · 24h reply

Why ₦25,000/month matters more than any pack: one ₦300,000 build with twelve months of care is ₦600,000. Care is attached to every project from day one, including the first one.

The bundle — an upgrade, never the entry

All nine packs, ₦25,000 instead of ₦45,000. Offered only to someone who already bought one pack or asked about two. It must never appear as the first price a stranger sees, because it destroys the easy first yes.

WHAT SUCCESS LOOKS LIKE, IN NUMBERS

04

The money model and the goals

Where month-1 revenue actually comes from

Not from platform payouts. TikTok Creator Rewards does not operate in Nigeria, Instagram pays nothing at this scale, and Facebook is a month 4–6 possibility at best. Month one is packs sold in DMs, plus one project closed by direct outreach.

Lever	What it is	Share of month 1 revenue
Outbound free site reviews	10 short voice notes a week, no pitch, 3 fixes each	55%
Daily content	Proof, familiarity, inbound DMs	30%
DM conversion	Every comment, save, reply becomes a conversation	15%

Targets

	Floor	Target	Stretch
Pack sales	5 ₦25,000	12 ₦60,000	20 ₦100,000
First project	—	1 × ₦150,000	2 × ₦150,000
Care attached	—	1 ₦25,000/mo	2 ₦50,000/mo
Month 1 cash	₦25,000	₦235,000	₦450,000

The 90-day forecast

Month	Packs	Projects	Care	Cash	Cumulative
1	8–12	1	1	₦200k–₦285k	₦200k–₦285k
2	20–25	2	2–3	₦400k–₦575k	₦600k–₦860k
3	30+	2–3	4–6	₦500k–₦800k	₦1.1m–₦1.66m

Planning targets, not promises. They assume the outbound volume in §05 actually happens.

The funnel maths behind the target

Stage	Assumption	30-day volume
Impressions	~300 median views × 330 videos	~99,000
Profile visits	1–2% of views	1,000–2,000
DMs / link taps	8–12% of visits	80–240
Pack sales	8–12% of DMs	8–20 packs

> If median views are 150 instead of 300, the target halves. That is precisely why outbound carries 55% of month one — it does not depend on the algorithm.

THE FIVE MECHANISMS THAT PRODUCE CASH

05

How we sell

1 · The free site review (highest leverage hour of the week)

Ten per week. A 60–90 second voice note to a Lagos business with three specific fixes for their site or their Instagram page. No pitch inside the note. The moment they reply, you have a conversation — and the pack is what you offer inside that conversation.

01 Pick 10 businesses a week from Instagram, Google Maps and referrals.

02 Open their site or page on a phone. Note three concrete problems.

03 Record one voice note. Name the three, say which one to fix first, stop.

04 Send. Log in the tracker. Do not follow up for 48 hours.

05 When they reply, answer the question. Do not attach a price to the first reply.

2 · The DM flow

01 They message a keyword. Reply within 15 minutes with the saved reply for that keyword.

02 One qualifying question — not three. "Do you sell mostly on WhatsApp or Instagram?"

03 Send the pack summary + price + payment link in one message.

04 If they go quiet: one follow-up after 24 hours, one after 72. Then stop.

05 After payment: deliver the file, then ask one question about their business. That answer is the project lead.

3 · The audit call (20 minutes, screen shared)

— Minutes 0–3: they talk. What is the actual problem this month?

— Minutes 3–12: you show three things on their site, in order of cost to them.

— Minutes 12–17: the fix, and what it costs. Fixed price from the published menu.

— Minutes 17–20: next step — proposal within 24 hours, valid five days.

4 · The proposal (one page, five-day validity)

Block	Contents
Problem	The three things the audit found, in their words.
Scope	Exactly what is built, page count, what is not included.
Price	One number. No tiers, no "from", no discount.
Timeline	Start date, delivery date, what you need from them by when.
Terms	50% to start, 50% on delivery. Care begins month two.
Validity	Five working days, then the price is re-quoted.

5 · Objection handling

They say	You say
“Too expensive.”	“Compared to what — another quote, or the cost of the site you have now?” Then offer the ₦5,000 pack as the do-it-yourself route.
“I’ll think about it.”	“Of course. What is the one thing that would make this an easy yes?”
“Can you do it cheaper?”	“I can do less for less. I cannot do the same work for less.”
“Send me examples.”	Send the two closest builds, labelled concept if they are not client work.
“My cousin can do it.”	“Then use him for the build. Buy the ₦5,000 pack so he has the copy to work from.”

HOW ONE PURCHASE BECOMES THE NEXT FIVE

06

The customer loop

A business that sells once is a job. A business that loops is an asset. This is the loop every asset in the system is designed to feed.

CONTENT → FIRST PURCHASE → DELIVERY → PROOF → UPGRADE → REFERRAL → CONTENT

Stage by stage

Stage	What happens	What it must produce
Attract	Daily posts: memes reach, teaching earns trust, skits break out	Profile visit or DM
First purchase	₦5,000 pack, keyword in DM, payment link	Cash + a buyer who trusted us
Delivery	Instant file + one personal question about their business	A reply. A real detail.
Proof	Ask at day 7: “did it work — what changed?” Screenshot with permission	A testimonial or a case study
Upgrade	At day 10–14, one message: the thing the pack cannot do	Audit call booked
Referral	Ask once, plainly, after a win: “who else has this problem?”	One warm name
Content	The testimonial and the before/after become next month’s posts	Better proof

The three messages that make the loop turn

> Day 7 — the proof ask. “Quick one: did the scripts help? I am collecting before-and-afters for the page — happy to credit you or keep it anonymous.”

> Day 14 — the upgrade ask. “The pack gives you the scripts. The thing it cannot do is answer the messages for you. If you ever want that built, that is a project. Want me to send what it costs?”

> Day 30 — the referral ask. “Who is one other business owner you know with the same problem? No pressure — I will send them the same free review I sent you.”

Why the loop beats more content

A new follower costs impressions. A repeat buyer costs one message. The loop is the only part of this business that gets cheaper every month, which is why §05 is weighted more heavily than §08.

HOW THE WEEK ACTUALLY RUNS

07

Operations

The weekly rhythm

Day	Block	Time	Output
Sunday	Batch shoot	4h	7 skits, 11 voiceovers, 21 meme backgrounds
Monday	Sell	1h	10 free reviews sent
Wednesday	Batch build	3h	28 carousels from 5 templates
Daily	Assembly	90m	11 videos cut, 33 captions adapted, scheduled
Daily	Selling	45m	DM replies, follow-ups, tracker
Friday	Scorecard	30m	Six metrics, kill list, next week’s hooks

Total 22 hours a week at full cadence. A plan you cannot keep is worse than a smaller plan you can. Standard (18 posts/day) is 14 hours; Minimum (4 posts/day) is 5.

Tools

Job	Tool	Cost
Design	Canva Pro (templates built once)	₦4,000/mo
Video	CapCut (captions, cuts)	Free
Scheduling	Meta Business Suite + TikTok native	Free
Files	Google Drive (this structure)	Free
Payments	Paystack or Selar	Transaction fee
Chat	WhatsApp Business (labels, saved replies)	Free
Tracker	Google Sheets	Free

Asset naming — non-negotiable

D03-07_UPGRADE_TIKTOK_v1.mp4 · D03-07_UPGRADE_IG_S03.png

Day, slot, type, platform, version. If a file cannot be identified from its name, the system dies in week two. Loose files in a camera roll are the single most common failure point.

Half-done work is the enemy

One finished carousel beats four unfinished ones. The rule is simple: nothing leaves the folder unless it passes the ten-point checklist. A beautiful asset with text under the caption bar is not 90% done — it is wrong.

THE ENGINE, IN BRIEF

08

Content strategy

The full production material lives in 03 — Social Content Library. This is the strategy it serves.

Slot	Time (WAT)	Type	Job
1	07:00	Meme	Reach
2	08:00	Teach	Authority
3	09:15	Skit	The viral vehicle
4	10:00	Trust	Honest answer, no pitch
5	11:30	Offer	Pack spotlight
6	13:45	Teach	Authority
7	15:00	Hot take	Comments and shares
8	16:30	Meme	Reach
9	18:00	Upgrade	The ₦150k project
10	19:30	Meme	Reach, evening prime
11	20:45	Offer	Pack spotlight, evening prime

Mix: Teach 3 · Meme 3 · Offer 2 · Trust 1 · Hot take 1 · Skit 1 · Upgrade 1. Memes are 27% of output — inside the 20–30% band that keeps a feed human.

One idea, three platforms

ONE IDEA ⍰ TikTok video · Instagram carousel or meme · Facebook 120-word post

Thirty-three posts a day is not thirty-three creations. It is eleven assets rendered three ways. That single distinction is the difference between a system that survives and one that collapses in week three.

Platform rules of thumb

Platform	What performs	Rule
TikTok	Skits and kinetic type, 15–30s	Hook in 3s. Original audio. Personal account.
Instagram	Carousels, 5–10 slides, 4:5	Saves matter more than likes.
Facebook	Text posts, 80–180 words	End on a question. Oldest audience lives here.

> Safe zone: keep every word, face and logo inside x 90–990, y 270–1250 on a 1080×1920 canvas. That one box is safe on TikTok, Instagram Reels, Facebook Reels and Stories simultaneously.

HOW WE GET KNOWN, NOT JUST PRESENT

09

The growth path

Why skits carry the virality target

Format	Median views (Nigeria, 2026)
Skit	~148,000
Voiceover + B-roll	~17,000
Talking head	~3,200

A skit reaches roughly 9× a voiceover and 46× a talking head. Teaching builds authority; the skit is the only format that reaches strangers. No face required — hands, objects, chat screens.

The swing system

Twice a week, post one deliberate swing: a format or angle outside the normal rotation. Judge it after 72 hours on one number — views against your 30-day median.

— Above 3× median make three more of it this month.

— Below 0.5× median retire the angle, not the format.

— In between leave it in rotation, no conclusion.

Milestones

Day	Followers (combined)	View milestone	Business milestone
30	800–1,500	3 videos > 10k	12 packs · 1 project · 1 care
60	3,000–5,000	2 videos > 100k	25 packs · 3 projects
90	10,000–15,000	1 video > 500k	₦1m+ cumulative
120	20,000–30,000	median doubled	First brand-deal conversation
180	40,000–60,000	2 videos > 1m	Paid community opens

> Measure the median, not the best. One viral video with a flat feed is luck. A rising median is a business.

SIX NUMBERS, AND THE RULES THAT FOLLOW THEM

10

Metrics and governance

#	Metric	Where	Healthy month 1
1	DMs started	Inbox count	60+
2	DMs pack sales	Tracker	10–15%
3	Median views per video	Platform analytics	Rising week on week
4	Saves + shares	Instagram insights	2%+ of reach
5	Reviews sent replies	Your own sheet	25–35%
6	Cash collected	Bank / Paystack	Against the floor

Likes are not a metric. They are a by-product. The three that decide whether the plan continues are DMs, cash, and median views.

The Friday scorecard — six questions

01 Which three posts got the most views? What did they share?

02 Which three got the least? Retire that angle.

03 How many DMs, and how fast was the first reply?

04 What sold, at what price, to whom?

05 What got skipped this week, and why?

06 Next week: one thing to double, one thing to kill.

Kill rules

Day	Condition	The rule
14	Nothing sold	Change the door (bio, keyword, reply speed) and the flagship. Do not add volume.
30	Median views flat	The hooks are the problem, not the frequency. Rebuild the hook bank.
60	Packs sell, projects do not	The audit call is the bottleneck. Fix the call, not the feed.
90	Cash below ₦200k	Stop the cadence. Sell projects only for 30 days. Content is not the constraint.

THE SHORT LIST THAT PREVENTS EXPENSIVE MISTAKES

11

Compliance and risk

A checklist to take to a Nigerian accountant or lawyer once — not legal advice.

Business basics

— CAC registration before invoicing projects — corporate clients ask.

— TIN to open a business account and invoice properly.

— VAT applies above the small-company turnover threshold (₦25m under current rules). Confirm with your accountant.

— Separate account. Project money must not land in a personal account.

Selling digital products

— Publish what the buyer gets, how it is delivered, and what support is included.

— Do not write “no refunds, no exceptions.” Use: “Digital download. If the file is faulty we replace it within 7 days. Results are not guaranteed.”

— No income or results guarantees, anywhere, ever.

— Every non-client build labelled concept project · sample build.

Data and platforms

— NDPA 2023 — opt-in before adding anyone to a broadcast list. A reply is not marketing consent.

— A one-page privacy note: what you collect, why, how to be removed.

— Disclose AI-generated content where the platform requires it.

— No bought followers, pods, or follow-for-follow — they block monetisation later.

> The reputational risk is bigger than the legal one. One invented testimonial costs more than a year of compliance admin. When in doubt, say the smaller true thing.

Project range	₦150,000 – ₦650,000
Care	₦25,000/month

The three sentences that run this business:

Something must be sold in the first fourteen days.

DMs are the only metric that matters in month one.

Every post points one rung up, and never two.
