How to use this pack

This is a working document, not a book. You do not need to read it in order, and you do not need to finish it before you start. Open the section that matches the problem in front of you today.

> Nothing needs to be filled in before you start. The scripts and prompts are ready to copy. Change the names, prices and items so they sound like you, and keep the structure exactly as it is.

What is in this pack

— 30 ready prompts for real small-business tasks

— The four-part prompt structure

— A checking routine for AI output

— What never to let AI write for you

— Before/after prompt rewrites

Who it is for

Business owners already using ChatGPT or similar tools, who get output that sounds generic, wrong, or suspiciously confident.

What this pack will not do

It will not do the work for you, and it does not guarantee a result. It gives you the structure, the words and the routine. The rest is you, doing it consistently for a few weeks. That is not a small thing — most people do not.

THE PROBLEM

Why this exists

Most people prompt with one line and accept whatever comes back. The output is bland because the input was empty.

A good prompt is a brief: who you are, who it is for, what you want, and what good looks like.

PART 01

The four-part prompt

Every prompt in this pack follows the same shape. Copy the shape, change the details.

— Role — 'You are writing for a small tailoring business in Lagos.'

— Task — ‘Write five WhatsApp replies to a customer asking for a discount.’

— Constraint — ‘Under 30 words each. No exclamation marks. Nigerian English.’

— Standard — ‘Sound like a person, not an advert. Give me the plainest version first.’

PART 02

The checking routine

Never send AI output you have not read out loud. Four checks, sixty seconds.

— True? Does it claim something you cannot back up?

— Yours? Could a competitor paste it unchanged? Then it is not specific enough.

— Natural? Would you say that sentence to a customer’s face?

— Safe? Does it promise results, advice or facts you cannot verify?

SECTION D

Find my blind spot	Here is my plan: [plan]. What am I not seeing? List 5 things, most important first.

Teach me to check	How would I verify whether this claim is true: [claim]? Give me the exact steps.

DO THIS

The checklist

Work down the list in order. Tick as you go. If you only do the first three, you will still be ahead of most people who bought this.

Before you prompt	☐	Decide what good output looks like. If you cannot describe it, the AI cannot produce it.
In the prompt	☐	Give the role, the task, the constraint and the standard. Every time.
First output	☐	Assume it is wrong. Read it out loud.
Second pass	☐	Ask for the plainest version. Then ask for a shorter version.
Check facts	☐	Anything with a number, a date, a law or a price must be verified elsewhere.
Check voice	☐	Replace any word you would not say out loud.
Final	☐	Add one specific detail only you would know. That is what makes it yours.

QUESTIONS

Five things people ask

Will clients know it is AI?

They will know if it is generic. Specificity is the tell — add your real details.

Should I let AI write my prices?

No. Prices are a business decision, not a writing task.

Can it write legal or medical content?

No. Use it to draft questions for a professional, never as the answer.

Do I need the paid version?

Not to start. The free versions handle everything in this pack.

What about my customer data?

Never paste customer names, numbers or private messages into a public AI tool.
