PRODUCT PACK · LAUNCH

The Website Launch & Care Handbook

A site that still works in month six.

Easywurld · Lagos, Nigeria
LAUNCH · ₦5,000 · edition 01
Version 1.0 · October 2026

How to use this pack

This is a working document, not a book. You do not need to read it in order, and you do not need to finish it before you start. Open the section that matches the problem in front of you today.

> Two sections need your own information before this pack is fully useful: the your details worksheet on the next page, and the checklist at the back. Fill in the worksheet first — it takes about ten minutes, and everything else refers back to it.

What is in this pack

— The pre-launch checklist

— Launch day, hour by hour

— The first 30 days after going live

— A monthly care routine

— A handover document so you own everything

Who it is for

Business owners who have a website, or are about to pay for one, and want it to keep working after the launch photos.

What this pack will not do

It will not do the work for you, and it does not guarantee a result. It gives you the structure, the words and the routine. The rest is you, doing it consistently for a few weeks. That is not a small thing — most people do not.

THE PROBLEM

Why this exists

Most websites do not fail at launch. They fail three months later, when nobody updated the hours, the phone number changed, the SSL expired, and the forms silently stopped sending.

This handbook makes the boring parts routine.

PART 01

The truth about ‘done’

A website is not a project with an end. It is a shopfront that needs the same weekly attention as the physical one.

— The most expensive website is the one nobody maintains.

— Every item in this handbook takes minutes. Missing them costs days.

PART 02

The care routine, monthly

— Week 1 — Check every form and WhatsApp button actually sends.

— Week 2 — Update anything that changed: hours, prices, staff, stock.

— Week 3 — Check speed and mobile layout on a real phone.

— Week 4 — Back up, check the bill, check the domain and SSL expiry dates.

SECTION A

Pre-launch — the 20 checks

Content	Every page has real text — no lorem ipsum, no placeholder images, no ‘coming soon’.
Contact	Phone, WhatsApp link, email and address tested from three different devices.
Forms	Send a test message. Confirm it arrives. Confirm the auto-reply works.
Mobile	Every page opened on a real phone, not a browser resize.
Speed	Homepage loads in under 3 seconds on mobile data.
Links	Every link clicked. No 404s, no links to unpublished pages.
SEO basics	Title and description written for every page. One H1 per page.
Legal	Privacy note and terms live. Contact details on every page.
Analytics	Tracking installed and confirmed firing.
Backup	A full backup taken before launch, stored somewhere you control.

SECTION B

Launch day

Morning	Final backup. Screenshot every page as it should look.
Midday	Publish. Test the live domain, not the preview.
Afternoon	Test on mobile data, then on a friend’s phone on a different network.
Evening	Announce it. Link in bio, WhatsApp status, one post. Nothing more elaborate.

Next morning	Check the forms and analytics. Most launch-day failures appear overnight.

SECTION C

The first 30 days

Day 1–3	Watch the analytics. Where do people leave? Fix the first screen if they leave immediately.
Day 7	First review: which page gets traffic, which gets none. Delete or merge the dead ones.
Day 14	Add the first new content: a real photo, a new offer, a review.
Day 21	Check speed and mobile again now that real images are in.
Day 30	First monthly report. Then repeat the routine from the top.

SECTION D

Handover — what you must own

Domain	Registered in your name, with your email as the contact. Not the developer's.
Hosting	Account in your name, billing in your name. You should be able to move it.
CMS access	Admin login for your site, with your own email, not a shared one.
Analytics	Your Google account has admin access.
Backups	A copy you can download, plus a schedule for the next one.
Passwords	In a password manager, not a WhatsApp message.

YOUR DETAILS

The worksheet — fill this in first

Answer in the plainest words you have. Do not write what you think a business should sound like — write what you would say to a customer standing in front of you.

Business name and what you sell, in one line:

Who your best customer is (age, area, what they do):

The problem they come to you with, in their words:

What you do that a competitor does not:

Your price or price range:

Your delivery time or turnaround:

How a customer reaches you (number, handle, address):

The one thing you want this pack to fix first:

Who owns your domain and hosting:

Where your backups live:

DO THIS

The checklist

Work down the list in order. Tick as you go. If you only do the first three, you will still be ahead of most people who bought this.

Before launch	☐	Run the 20 checks. Do not skip forms — they fail silently.
Launch day	☐	Publish, then test the live domain on mobile data.
Week 1	☐	Watch analytics daily. Leave the design alone for seven days.
Week 2	☐	Fix what the data says, not what you feel.
Week 3	☐	Add one piece of real content.
Week 4	☐	First report, first backup, first bill check.
Monthly	☐	Repeat the four-week care routine. Put it in the calendar.
Annually	☐	Review hosting, domain renewal, and whether the site still explains the business.

QUESTIONS

Five things people ask

How often should I update my site?

Anything factual (hours, prices, stock) immediately. Everything else, monthly is enough.

Do I need to pay for maintenance?

You can do it yourself with this handbook, or pay someone. What you cannot do is ignore it.

What is the most common failure?

Forms that stop sending without anyone noticing. Test them monthly.

Who should own the domain?

You. Always you. If a developer owns it, transfer it now.

Should I redesign every two years?

No. Fix the words first. Most ‘we need a redesign’ problems are copy problems.

SUPPORT

If something is unclear

Message us on WhatsApp and ask. If a file will not open, or a page is missing, we replace it within seven days, no questions. That is the whole support promise — there is no upsell waiting at the end of it.
