# EASYWURLD

SIMPLIFY. OPTIMIZE. GROW.

---

# Nine Practical Offers

## for Small Businesses

Nine do-it-yourself resource packs for Nigerian small businesses.
Web design, SEO, content, systems, local visibility and launch.

Price: **₦5,000** each · Digital download · Do it yourself

WhatsApp: **0905 069 0837** · Message the keyword for the pack you want.

website-builder-portfolio.vercel.app

## How to buy

Three steps. No account, no software, no subscription.

1. **Choose a pack.** Each one below is ₦5,000. If you are not sure which one you need, message us on WhatsApp first and describe the problem. We will point you to the right pack, or tell you honestly that you do not need to buy anything yet.
2. **Pay.** We send you a transfer or payment instruction. You pay and send the payment confirmation.
3. **Receive your files.** We send the download link on WhatsApp, usually the same day. The files open on your phone, your laptop and your tablet.

### How to read the numbers in this document

Beside each pack we show what we estimate it would cost to produce, calculated as hours of work multiplied by ₦5,000 per hour. That is our estimate of the hours an independent professional would need to research, write and format each item. **It is not a previous selling price and it is not a promise.** Everything here is a do-it-yourself resource. It cannot create customers for you and it cannot guarantee results. What it does is give you the plan, the templates and the words so you are not starting from a blank page at 11pm.

### A note on what we do not do

We do not publish client results we cannot evidence, rankings, ratings, testimonials or speed scores we have not measured. Every pack below is written to be used on its own, without buying anything else from us, and without hiring us.

1 The Chat-to-Customer Playbook PLAYBOOK
2 The Clear Homepage Blueprint CLEAR
3 The 30-Day Content Engine ENGINE
4 The One-Offer Landing Page Kit PAGE
5 The Lagos Local Visibility Starter LOCAL
6 The Clear Message Workbook MESSAGE
7 The Everyday AI Prompt Desk PROMPTS
8 The Proposal & Report Template Pack TEMPLATES
9 The Website Launch & Care Handbook LAUNCH

# The Chat-to-Customer Playbook

Turn WhatsApp and DM enquiries into paid orders, with scripts, a tracker and a follow-up routine you can start today.

---

Message **PLAYBOOK** on WhatsApp: 0905 069 0837 ₦5,000

---

### Who it is for

Small-business owners in Nigeria who sell by WhatsApp or Instagram DM: fashion, food, beauty, home

services, resellers and service providers who answer enquiries themselves.

### The problem it solves

Enquiries arrive all day. Replies are slow or inconsistent, quotes get sent and never followed up, and “how much?” turns into silence.

### What it gives you

A written reply flow, ready-to-paste scripts and a tracker, so every enquiry gets a clear answer and a planned follow-up. It will not create enquiries or guarantee sales; it helps you convert more of the enquiries you already get.

### Why this pack exists

For many small businesses the chat is the shop counter. A customer who asks a price and gets no clear answer, or no follow-up, usually buys from whoever replied better. Each lost chat is money you already paid to attract.

### What you will get out of it

- Reply faster with less typing: 36 scripts you adapt in seconds.
- Never forget a follow-up: the tracker shows who to message today.
- Sound consistent and professional, even on a busy day.
- Spot where chats stall, so you fix the right step.
- Set up WhatsApp Business features (labels, quick replies, away message) in one afternoon.

### What you get

| # | File | Format | What is inside | Hours | Est. value |
|---|---|---|---|---|---|
| 1 | **Chat-to-Customer Playbook** | PDF + editable DOCX | The five-stage enquiry-to-order flow, response-time rules, how to write a price reply, the 1-3-7 follow-up rhythm, WhatsApp Business setup, a worked | 2.5 | ₦12,500 |

| # | File | Format | What is inside | Hours | Est. value |
|---|---|---|---|---|---|
| | | | example and a weekly review routine. | | |
| 2 | **36-Script Message Library** | Editable DOCX | Ready-to-paste scripts for greetings, price questions, quotes, delivery, payment, follow-ups, objections, complaints, reviews and re-engagement, each with a note on when to use it. | 2.5 | ₦12,500 |
| 3 | **Lead & Follow-Up Tracker** | XLSX spreadsheet | A lead log with status dropdowns, automatic follow-up due flags, a quick-replies sheet and a weekly review dashboard that counts your results. | 1.5 | ₦7,500 |
| 4 | **7-Day Setup Checklist** | PDF + editable DOCX | A day-by-day checklist to get the whole system running in a week without | 0.5 | ₦2,500 |

| # | File | Format | What is inside | Hours | Est. value |
|---|---|---|---|---|---|
| | | | overwhelm. | | |
| | **Total** | | | 7 | ₦35,000 |

*Estimated replacement cost ₦35,000 = 7 hours × ₦5,000 per hour. This is our estimate of the hours an independent professional would need to research, write and format these items. It is not a previous selling price.*

## How to use it

1. Read the Playbook (about 25 minutes).
2. Follow the 7-day setup plan to configure WhatsApp Business: profile, labels, greeting and away message.
3. Copy the scripts you need into Quick Replies and edit them into your voice.
4. Log every new enquiry in the tracker, with the next follow-up date.
5. Each morning filter the tracker to “follow up today” and send the follow-ups.
6. Every Friday, do the 15-minute weekly review and fix the stage where chats stall.

## What it does not do

- The tracker is an Excel file (works in Excel, Google Sheets and LibreOffice). WhatsApp Business is free, but you must install it yourself.
- It does not generate leads or guarantee sales. Results depend on your product, price and how consistently you use it.
- Scripts are starting points. Edit them so they sound like you.
- No consultation is included. Questions about the files can be sent on WhatsApp, but custom work is not part of the ₦5,000.

## Questions people actually ask

### Do I need WhatsApp Business?

It helps (labels, quick replies, away message), but the scripts and tracker work on any WhatsApp or DM app. The setup guide covers the free WhatsApp Business app.

### Will this work for my type of business?

It is built for businesses that sell by chat: products, services and bookings. If you sell mostly in-person,

the follow-up and quote scripts still apply.

### Can I use the scripts in Pidgin or Yoruba?

Yes, and you should if that is how your customers talk. Each script explains its purpose so you can rewrite it in your own voice.

### Is this an app or automation?

No. It is a playbook, scripts and a spreadsheet. You stay in control of every message. Nothing is auto-sent.

### What if I need more help?

Easywurld also builds business systems and websites as paid projects. Message us on WhatsApp for a range. That is separate from this ₦5,000 resource.

# The Clear Homepage Blueprint

Rewrite your homepage so a visitor knows what you sell, who it is for and what to do next, within ten seconds.

---

Message **CLEAR** on WhatsApp: 0905 069 0837₦5,000

---

Who it is for

Small-business owners and freelancers with a website (or about to build one) who suspect visitors leave without understanding what they offer.

### The problem it solves

The homepage talks about the business and not the visitor. Headlines are vague, the next step is hidden, and visitors leave without enquiring.

### What it gives you

A rewritten homepage structure and first draft of your copy that answers the three questions every visitor

arrives with. It will not guarantee more enquiries, but it removes the most common reasons visitors leave confused.

### Why this pack exists

Visitors decide quickly whether a site is for them. If the first screen does not say what you do, who it helps and what to do next, a good service can look irrelevant, however well designed the page is.

### What you will get out of it

- Write your first screen in one sitting using proven fill-in formulas.
- Know what goes on a homepage, in what order, and what to leave out.
- Audit your own site in 20 minutes with a scored checklist.
- Hand a clear content brief to any designer or developer.
- Write page titles and descriptions that make sense in search results.

### What you get

| # | File | Format | What is inside | Hours | Est. value |
|---|---|---|---|---|---|
| 1 | **Clear Homepage Blueprint** | PDF + editable DOCX | The three visitor questions, the ten-second test, a proven section order, how to write the first screen, calls to action, page titles and a before/after example. | 2.5 | ₦12,500 |
| 2 | **Homepage Copy Templates** | Editable DOCX | Fill-in templates for hero headlines, subheadings, service blurbs, trust section, FAQ, about and contact sections, plus 12 call-to-action | 2 | ₦10,000 |

| # | File | Format | What is inside | Hours | Est. value |
|---|---|---|---|---|---|
| | | | options. | | |
| 3 | **Homepage Content Planner** | XLSX spreadsheet | A section-by-section planner with purpose, headline, copy, proof, image notes, status and automatic word counts. | 1 | ₦5,000 |
| 4 | **20-Point Homepage Audit Scorecard** | PDF + editable DOCX | A scored checklist to audit any homepage, yours or a competitor's, in about 20 minutes. | 1 | ₦5,000 |
| | **Total** | | | 6.5 | ₦32,500 |

*Estimated replacement cost ₦32,500 = 6.5 hours × ₦5,000 per hour. This is our estimate of the hours an independent professional would need to research, write and format these items. It is not a previous selling price.*

## How to use it

1. Run the 10-second audit on your current homepage and note your score.
2. Read the blueprint and choose your section order.
3. Fill in the Content Planner spreadsheet section by section.
4. Use the copy templates to write your hero, proof, FAQ and calls to action.
5. Check titles, descriptions and mobile view with the final checklist.
6. Publish. Run the audit again and compare.

## What it does not do

- This is a do-it-yourself resource. It does not include a website build or a personal review of your page.
- It does not guarantee more enquiries, traffic or search rankings.

- You need to supply your own facts: what you offer, prices or price ranges, real proof you have.
- Writing templates are in English; adapt to your customers' language.

### Questions people actually ask

**Do I need a website already?**

No. If you are planning one, the blueprint works as your content brief. If you have one, you can audit and rewrite it.

**Is this about design or words?**

Mostly words and structure, because that is where most homepages go wrong. You can apply it in any builder: Wix, WordPress, Webflow, Squarespace or custom code.

**Do you review my homepage for ₦5,000?**

No. This is a self-guided resource. If you want Easywurld to rewrite or build your site, message us for a quote.

**I have no testimonials. Can I still use it?**

Yes. The blueprint shows how to build trust honestly without testimonials: process, specifics, guarantees you can keep, sample work.

**Which files do I get?**

A PDF blueprint (plus editable DOCX), a copy templates document, a scored audit checklist and an Excel content planner.

# The 30-Day Content Engine

A realistic one-person content system: pillars, 60 post ideas, hook formulas and a 30-day calendar you can fill in one sitting.

---

Message **ENGINE** on WhatsApp: 0905 069 0837 ₦5,000

---

### Who it is for

Small-business owners and solo founders who post on Instagram, Facebook, TikTok or LinkedIn but run out of ideas, post randomly, or burn out after two weeks.

### The problem it solves

Posting is inconsistent. You start strong, run out of ideas, and every post feels like a fresh decision. Nothing connects to sales.

### What it gives you

A 30-day plan you built yourself, using a content mix that balances teaching, showing, trust and selling, with ideas, hooks and captions ready to adapt. It will not guarantee followers or sales, but it makes consistent posting practical.

### Why this pack exists

Consistency builds familiarity and trust, and a system removes the daily “what do I post?” decision. Without one, content depends on your mood and time, and usually stops.

### What you will get out of it

- Plan a full month in about two hours.
- Never start from a blank page: 60 ideas and 25 hook formulas.
- Balance educational and sales posts using four content pillars.
- Set a posting rhythm that fits the time you really have.
- Track what works with a simple monthly review.

### What you get

| # | File | Format | What is inside | Hours | Est. value |
|---|---|---|---|---|---|
| 1 | **30-Day Content Engine Guide** | PDF + editable DOCX | The four-pillar system, weekly batching routine, how to build carousels and short videos with | 2 | ₦10,000 |

| # | File | Format | What is inside | Hours | Est. value |
|---|---|---|---|---|---|
| | | | free tools, repurposing, platform notes and the monthly review. | | |
| 2 | **60-Idea Post Bank** | Editable DOCX | Sixty prompts across Teach, Show, Trust and Sell that work for service and product businesses, with a suggested format for each. | 1.5 | ₦7,500 |
| 3 | **30-Day Content Calendar** | XLSX spreadsheet | Auto-dated 30-day planner with pillar, format, platform, hook, caption, CTA and status columns, plus pillar-balance and monthly review sheets. | 1.5 | ₦7,500 |
| 4 | **Hooks and Caption Swipe File** | Editable DOCX | Twenty-five hook formulas, eight caption frameworks with examples and 15 calls to action. | 1.5 | ₦7,500 |
| | **Total** | | | 6.5 | ₦32,500 |

*Estimated replacement cost ₦32,500 = 6.5 hours × ₦5,000 per hour. This is our estimate of the hours an independent professional would need to research, write and format these items. It is not a previous selling price.*

## How to use it

1. Read the guide and pick your posting rhythm (3, 4 or 5 posts a week).
2. Define your four pillars with the worksheet.
3. Choose 12 to 20 ideas from the bank that fit your business.
4. Fill the calendar: set the start date and the sheet fills dates and pillar balance.
5. Batch-create one week of content in a single 2-hour session.
6. Publish, reply to comments, and run the monthly review.

## What it does not do

- It is a planning system and a swipe file, not finished posts for your business. You write or design the content using the templates.
- It does not include design templates or scheduling software. Canva, CapCut and the native Meta/LinkedIn schedulers are free to use.
- Platform features and algorithms change, and no plan can guarantee reach, followers or sales.
- You need to supply real photos, facts and prices from your own business.

## Questions people actually ask

### Which platforms does it cover?

Instagram, Facebook, TikTok and LinkedIn. The system is platform-agnostic, with notes on adapting each post.

### Do I need to show my face?

No. The idea bank includes faceless formats: carousels, text posts, product close-ups, process shots and voice-over.

### How much time does it take each week?

About two hours to batch, plus a few minutes to publish and reply. You can scale to your own capacity.

### Does it include ready-made posts?

It includes ideas, hooks and caption frameworks to write your own quickly. It is not a set of finished posts for a specific business.

### Will it get me followers?

No honest plan can guarantee that. It gives you consistency and a better content mix, which are things you control.

4 / 9

# The One-Offer Landing Page Kit

Plan, write and launch a single-purpose page for one offer, with a fill-in copy document and an editable HTML page you can open today.

---

Message **PAGE** on WhatsApp: 0905 069 0837₦5,000

---

Who it is for

Small-business owners, event organisers, coaches, makers and service providers launching one product, workshop, service or campaign who need a page to send people to.

### The problem it solves

You are launching something and sending people to an Instagram bio, a long website or a chat thread. There is no page that explains the offer and asks for one action.

### What it gives you

A completed page plan, full copy written for your offer, and an editable one-file web page ready to adapt and publish on a free or low-cost host. It will not guarantee sales, but it gives you a clear, professional page to send people to.

### Why this pack exists

A single-purpose page keeps attention on one decision. When visitors have to hunt across a full website or scroll through a profile, many do not reach the point of saying yes.

### What you will get out of it

- Know exactly what sections a one-offer page needs, and in what order.
- Write all the copy with fill-in prompts and a full worked example.

- Start from a clean, mobile-friendly HTML page with WhatsApp order buttons built in.
- Handle objections on the page before the visitor has to ask.
- Launch with a checklist so nothing embarrassing goes live.

### What you get

| # | File | Format | What is inside | Hours | Est. value |
|---|---|---|---|---|---|
| 1 | **One-Offer Landing Page Guide** | PDF + editable DOCX | When a landing page makes sense, the nine-section structure, how to write each section, handling objections, mobile and accessibility basics, and how to publish. | 2 | ₦10,000 |
| 2 | **Landing Page Copy Template with Worked Example** | Editable DOCX | Fill-in prompts for every section, plus a complete worked example for a fictional workshop. | 1.5 | ₦7,500 |
| 3 | **Editable Landing Page Starter (HTML)** | HTML file, opens in any browser | A responsive, accessible single-file page with comments on every section, an FAQ, WhatsApp buttons and brand colours you can change in five lines. | 2.5 | ₦12,500 |

| # | File | Format | What is inside | Hours | Est. value |
|---|---|---|---|---|---|
| 4 | **Pre-Launch Checklist** | PDF + editable DOCX | Twenty checks to run before you share the page. | 0.5 | ₦2,500 |
| | **Total** | | | 6.5 | ₦32,500 |

*Estimated replacement cost ₦32,500 = 6.5 hours × ₦5,000 per hour. This is our estimate of the hours an independent professional would need to research, write and format these items. It is not a previous selling price.*

## How to use it

1. Read the guide and choose your one offer and one action.
2. Complete the copy template, using the worked example as a model.
3. Open the HTML file in a text editor. Replace the [brackets] with your copy.
4. Add your WhatsApp number to the button links.
5. Test on your phone using the pre-launch checklist.
6. Publish on a host and share the link in your bio, status and posts.

## What it does not do

- This is a do-it-yourself kit. Publishing requires a host (several offer free plans) and, if you want your own address, a domain name. Those costs are yours.
- The HTML template is a simple starter page, not a custom-designed website. It has no payment processing; it uses WhatsApp or a link you provide.
- Easywurld does not build or host your page as part of the ₦5,000. A custom landing page is a separate paid project.
- It does not guarantee conversions or sales.

## Questions people actually ask

### Do I need to know how to code?

No. You edit the text between tags in a text editor, and the file explains each part. If you can edit a document, you can edit this.

### Where can I publish the page?

Any static host works, including free plans from providers such as Netlify, Vercel or GitHub Pages. The guide explains the simple steps. Check each provider's current terms and limits.

### Can I take payments on it?

The starter uses WhatsApp or a link you add. You can paste a payment link from a provider you already use. Setting up payment itself is not included.

### Is it just for products?

No. It suits workshops, services, events, courses and consultations. The copy template adapts to each.

### Will it look like everyone else's page?

It is a clean starting point. You change the colours, words and images. A custom-designed page from Easywurld is available as a paid project.

5 / 9

# The Lagos Local Visibility Starter

A 30-day local search starter: set up your Google Business Profile, fix your page titles and ask for reviews the right way.

---

Message **LOCAL** on WhatsApp: 0905 069 0837₦5,▯▯▯

---

Who it is for

Lagos (and other Nigerian city) businesses that serve customers locally: salons, restaurants, clinics, repair services, schools, tutors, shops, event vendors and professionals.

### The problem it solves

When people nearby search for what you do, you are hard to find, your listing is incomplete, and your website pages do not say what you do or where.

### What it gives you

A completed Google Business Profile, clearer page titles and descriptions, a keyword list based on how

customers actually search, a review-request routine and a 30-day task tracker. No one can honestly promise rankings, but these are the foundations that local visibility is built on.

### Why this pack exists

Many local customers start with a phone search and choose from what they see first. An incomplete listing or vague page titles make it harder for the right people to find and trust you.

### What you will get out of it

- Complete your Google Business Profile step by step.
- Write page titles and descriptions customers understand.
- Find the words local customers use, using free tools.
- Ask for reviews politely and ethically with ready scripts.
- Follow a 30-day plan, one small task at a time.

### What you get

| # | File | Format | What is inside | Hours | Est. value |
|---|---|---|---|---|---|
| 1 | **Local Visibility Guide** | PDF + editable DOCX | How local search works in plain words, profile setup, titles and descriptions, keywords, reviews, website basics, what not to do, and realistic expectations. | 2 | ₦10,000 |
| 2 | **Keyword and Page Title Worksheet** | Editable DOCX | A keyword brainstorm, 20 seed formulas, title and description formulas with Lagos examples and a location-page | 1.5 | ₦7,500 |

| # | File | Format | What is inside | Hours | Est. value |
|---|---|---|---|---|---|
| | | | template. | | |
| 3 | **Google Business Profile Checklist and Review Scripts** | Editable DOCX | A complete profile setup checklist and 12 review-request and review-reply scripts. | 1.5 | ₦7,500 |
| 4 | **30-Day Local Visibility Tracker** | XLSX spreadsheet | A day-by-day task list with progress counts, a keyword log, a review tracker and a monthly summary. | 1.5 | ₦7,500 |
| | **Total** | | | 6.5 | ₦32,500 |

*Estimated replacement cost ₦32,500 = 6.5 hours × ₦5,000 per hour. This is our estimate of the hours an independent professional would need to research, write and format these items. It is not a previous selling price.*

## How to use it

1. Read the guide to understand the basics (about 25 minutes).
2. Complete the Google Business Profile checklist.
3. Use the worksheet to build your keyword list and rewrite your titles and descriptions.
4. Start the review routine using the scripts.
5. Follow the 30-day tracker, one small task a day or a few per week.
6. Review your progress at day 30.

## What it does not do

- No ranking, traffic or customer numbers are guaranteed. Search results change and depend on competition, your location and many other factors.
- Platform menus (Google Business Profile, Search Console) change. The guide describes what each setting is for so you can find it.
- Verification of a Google Business Profile is done by Google and can take time.

- This is a do-it-yourself pack. It does not include Easywurld doing SEO work for you.

### Questions people actually ask

**Do I need a website?**

No. A complete Google Business Profile helps even without a site. If you have a website, the worksheet helps with titles and descriptions.

**Will this put me on page one?**

Nobody can honestly promise that. These steps address the basics Google looks at for local results: relevance, distance and prominence. How you rank depends on your area and competitors.

**Is it only for Lagos?**

It is written with Lagos and Nigeria in mind, but the steps apply to any city.

**Is Google Business Profile free?**

Yes, creating and managing a profile is free. Beware of anyone selling “guaranteed first position.”

**Can I buy reviews to speed up?**

No, and the pack tells you why. Fake reviews break Google’s rules and can harm your profile and reputation. The pack shows you how to ask real customers.

# The Clear Message Workbook

Work out who you serve, what makes you different and how to say it in one sentence, then put it into a one-page marketing plan.

---

Message **MESSAGE** on WhatsApp: 0905 069 0837₦5,000

---

### Who it is for

Founders and small-business owners who struggle to explain what they do, sound like every competitor, or change their message every month.

### The problem it solves

You cannot explain your business in one sentence. Your website, Instagram bio and pitch all say different things, and customers cannot tell why to choose you.

### What it gives you

A written positioning statement, a three-pillar message, a short voice guide, ready-to-use bios and pitches, and a one-page marketing plan. It will not guarantee sales, but you will know what to say and to whom.

### Why this pack exists

When your message is unclear, every marketing task is harder: posts, website, ads, referrals. Customers choose the business they understand fastest. Clarity comes before design, content or ads.

### What you will get out of it

- Define one specific customer, instead of “everyone.”
- Find three honest reasons customers choose you.
- Write a positioning statement and an elevator pitch.
- Get consistent bios for Instagram, LinkedIn, WhatsApp and your website.
- Leave with a one-page marketing plan for the next 90 days.

### What you get

| # | File | Format | What is inside | Hours | Est. value |
|---|---|---|---|---|---|
| 1 | **Clear Message Workbook** | PDF + editable DOCX | Guided worksheets for customer, problem, alternatives, differences, positioning statement, three-pillar message, voice guide and | 2.5 | ₦12,500 |

| # | File | Format | What is inside | Hours | Est. value |
|---|---|---|---|---|---|
| | | | elevator pitches, with a worked example. | | |
| 2 | **Customer Interview Kit** | Editable DOCX | Fifteen interview questions, a script for running five short interviews and a notes table to find patterns. | 1.5 | ₦7,500 |
| 3 | **Message Bank** | Editable DOCX | Templates for bios on Instagram, LinkedIn, WhatsApp and your website, plus 10-, 30- and 60-second pitches. | 1.5 | ₦7,500 |
| 4 | **One-Page Marketing Plan** | PDF + editable DOCX | A single page that holds your customer, message, channels, offers and 90-day priorities. | 1 | ₦5,000 |
| | **Total** | | | 6.5 | ₦32,500 |

*Estimated replacement cost ₦32,500 = 6.5 hours × ₦5,000 per hour. This is our estimate of the hours an independent professional would need to research, write and format these items. It is not a previous selling price.*

## How to use it

1. Work through the workbook in order: customer, problem, alternatives, differences.

2. Write your positioning statement and test it on three people.
3. Run the customer interviews using the question set (optional but recommended).
4. Fill in the message bank for your bios and pitch.
5. Complete the one-page marketing plan.
6. Update your website, bios and WhatsApp profile to match.

### What it does not do

- This is a self-guided workbook. It does not include a consultation or review of your answers.
- It helps you clarify; it does not research your market for you. The interview kit shows how to collect real input.
- It does not guarantee leads or sales.
- The worked example is fictional, for illustration.

### Questions people actually ask

**How long does it take?**

Most people finish the workbook in 2 to 3 hours, plus a week if you do the customer interviews.

**I am just starting. Is this too early?**

It is the best time. Clarity at the start avoids rewriting everything later.

**I have several services. Will it work?**

Yes. The workbook helps you find the common thread and decide what to lead with.

**Is it printable?**

Yes. You get a PDF to print and a DOCX to type in.

**Is there a consultation included?**

No. It is self-guided. Easywurld offers paid strategy work separately; message us if you want a quote.

# The Everyday AI Prompt Desk

60 copy-paste prompts for everyday business tasks, a prompt-writing guide and a template for a safe AI enquiry assistant.

---

Message **PROMPTS** on WhatsApp: 0905 069 0837 ₦5,000

---

### Who it is for

Small-business owners, solo founders and small teams who use (or want to use) an AI chat assistant for writing, customer replies, planning and admin, but get generic results.

### The problem it solves

You try AI tools and get vague, generic or wrong answers. You are not sure what to ask, what to trust, or what you should never paste in.

### What it gives you

A set of structured prompts you adapt in minutes, a method for writing your own, a safety and review checklist, and a template for designing a small enquiry assistant with clear boundaries. Output quality varies by tool; you always review before use.

### Why this pack exists

AI can save time on drafts, replies and planning, but only when you give it the right facts and check its work. Bad prompts waste time, and careless use can leak private data or publish mistakes.

### What you will get out of it

- Draft posts, replies, quotes and plans faster, from a starting point instead of a blank page.
- Learn the five-part prompt structure that gets specific results.
- Know what never to paste into an AI tool.
- Review AI output with a checklist before it reaches a customer.
- Design the boundaries of an AI enquiry assistant before building one.

### What you get

| # | File | Format | What is inside | Hours | Est. value |
|---|---|---|---|---|---|
| 1 | **AI Prompting Guide for Small** | PDF + editable DOCX | The five-part prompt structure, | 2 | ₦10,000 |

| # | File | Format | What is inside | Hours | Est. value |
|---|---|---|---|---|---|
| | **Business** | | how to give context, how to improve answers, safe-use rules, and what AI should never decide. | | |
| 2 | **60-Prompt Library** | Editable DOCX | Sixty copy-paste prompts in seven categories: content, customer replies, sales, documents, website and SEO, planning, and team. | 3 | ₦15,000 |
| 3 | **Enquiry Assistant Knowledge Sheet Template** | Editable DOCX | A template for FAQs, boundaries, handover rules, tone and a 15-question test script for a small AI enquiry assistant. | 1.5 | ₦7,500 |
| 4 | **AI Output Review and Safety Checklist** | PDF + editable DOCX | Twelve checks before you use any AI-written text, plus a never-paste list. | 0.5 | ₦2,500 |
| | **Total** | | | 7 | ₦35,000 |

*Estimated replacement cost ₦35,000 = 7 hours × ₦5,000 per hour. This is our estimate of the hours an independent professional*

*would need to research, write and format these items. It is not a previous selling price.*

### How to use it

1. Read the guide and learn the five-part prompt structure.
2. Open the prompt library and pick three tasks you do every week.
3. Replace the [brackets] with your real facts and run the prompts.
4. Check each result with the review checklist before using it.
5. Save the versions that work in your own prompt notebook.
6. If you want an enquiry assistant, complete the knowledge-sheet template first.

## What it does not do

- You need access to an AI chat tool. Many have free plans, and some features may need a paid plan. That cost is yours.
- AI tools make mistakes. Every output must be checked by a person before it is used, especially facts, prices, legal and medical statements.
- Prompts are structured starting points. Results vary by tool, model and the details you provide.
- The enquiry-assistant template is a design document. It does not build or install a chatbot. Easywurld builds assistants as separate paid projects.

## Questions people actually ask

**Which AI tool do I need?**

Any mainstream chat assistant works. The prompts are written in plain language, not for one specific product.

**Do I have to pay for an AI tool?**

Many tools have free tiers. Limits and features change. A paid plan is optional.

**Are the prompts guaranteed to work?**

They are structured to give specific, usable drafts, but no prompt can guarantee a perfect output. You adapt and check each result.

**Is it safe to put customer details into AI?**

Avoid pasting personal, financial or confidential information. The guide shows you how to anonymise details and what never to paste.

### Does this build me a chatbot?

No. The knowledge-sheet template helps you plan one carefully. Building and installing is a separate service.

8 / 9

# The Proposal & Report Template Pack

Editable proposal, quote, report and summary templates with worked examples, so your next document takes an hour, not a weekend.

---

Message **TEMPLATES** on WhatsApp: 0905 069 0837 ₦5,000

---

Who it is for

Freelancers, consultants, agencies, contractors, training providers and small teams who send proposals, quotes and reports to clients, partners or funders.

### The problem it solves

Each proposal or report is built from scratch. Documents are long, inconsistent and hard to skim, and quotes take too long to prepare.

### What it gives you

A set of editable templates and a short guide so you can produce a professional proposal, quote, progress report or executive summary in about an hour. It will not win business on its own; it makes it easier for a good offer to be understood.

### Why this pack exists

A clear proposal helps the client say yes, and a clear report helps them act. Documents that take hours to prepare also cost you billable time and slow your replies.

### What you will get out of it

- Send a professional proposal quickly using a tried structure.
- Prepare quotes and invoices with automatic totals.
- Write reports and summaries that busy people finish.
- Keep every document consistent, with the same look and sections.
- Reuse and adapt for each client without starting over.

## What you get

| # | File | Format | What is inside | Hours | Est. value |
|---|---|---|---|---|---|
| 1 | **Proposals and Reports Guide** | PDF + editable DOCX | How to structure documents for busy readers, the one-page rule, how to present pricing, how to follow up, and a pre-send checklist. | 1.5 | ₦7,500 |
| 2 | **Proposal Template with Worked Example** | Editable DOCX | A full proposal structure with prompts for each section and a completed fictional example. | 2 | ₦10,000 |
| 3 | **Report and Summary Templates** | Editable DOCX | A progress report, an executive summary and a one-page briefing, each with prompts and an example. | 1.5 | ₦7,500 |
| 4 | **Quote and Invoice Workbook** | XLSX spreadsheet | A quote sheet, an invoice sheet and a client log, with automatic | 1.5 | ₦7,500 |

| # | File | Format | What is inside | Hours | Est. value |
|---|---|---|---|---|---|
| | | | totals, an editable tax rate and print-ready layout. | | |
| | **Total** | | | 6.5 | ₦32,500 |

*Estimated replacement cost ₦32,500 = 6.5 hours × ₦5,000 per hour. This is our estimate of the hours an independent professional would need to research, write and format these items. It is not a previous selling price.*

### How to use it

1. Read the short guide on structure and writing for busy readers.
2. Open the proposal template and replace the prompts with your content.
3. Use the worked example to see the level of detail needed.
4. Prepare quotes and invoices in the Excel workbook.
5. Use the report and summary templates after each project or month.
6. Save your best proposals as your own library.

### What it does not do

- Templates are general business documents, not legal contracts. Have terms and contracts reviewed by a qualified professional.
- Tax rules (including VAT) vary by business. The workbook has an editable tax-rate cell; confirm what applies to you.
- You need Word (or a compatible editor such as Google Docs or LibreOffice) and Excel or Google Sheets.
- It does not guarantee that clients will accept a proposal.

### Questions people actually ask

**Which software do I need?**

Microsoft Word and Excel, or free alternatives such as Google Docs/Sheets and LibreOffice. Formats are standard DOCX and XLSX.

**Are the templates legal contracts?**

No. They include a terms section as a prompt, but you should have contracts and terms checked by a qualified professional.

**Can I use my own logo and colours?**

Yes. All templates are editable. Replace the headings, colours and add your logo.

**Is the invoice workbook compliant with Nigerian tax rules?**

It is a calculator and layout, not tax advice. Set the tax rate to what applies to your business after checking with your accountant or the relevant authority.

**Can I resell the templates?**

You can use them for your own business and clients. You may not resell or redistribute the pack itself.

# The Website Launch & Care Handbook

Everything between “I need a website” and “it is live and looked after”: planning, domain and hosting choices, a brief, a launch tracker and a monthly care routine.

---

Message **LAUNCH** on WhatsApp: 0905 069 0837 ₦5,000

---

Who it is for

Business owners planning their first website or a rebuild, and owners with a site nobody maintains, who want to make good decisions and not be dependent on whoever built it.

### The problem it solves

You do not know what to decide first, who should own the domain, how to compare quotes, or what has to happen after launch. Sites go live half-finished and then are never updated.

### What it gives you

A clear plan from idea to launch, a written brief you can hand to any designer, an account inventory so

you own what you pay for, a launch tracker and a monthly care routine. It does not build the site for you.

### Why this pack exists

Website problems are often ownership and process problems: a domain registered in a developer's name, no backups, expired renewals, no one updating content. They are avoidable with a few early decisions and a monthly routine.

### What you will get out of it

- Decide in the right order: goal, pages, content, domain, platform.
- Make sure you, not a developer, own your domain and accounts.
- Compare quotes using a checklist of questions and red flags.
- Launch with a tested pre-launch checklist.
- Keep the site healthy with a 30-minute monthly routine.

### What you get

| # | File | Format | What is inside | Hours | Est. value |
|---|---|---|---|---|---|
| 1 | **Website Launch & Care Handbook** | PDF + editable DOCX | Planning, content, domain and hosting basics, ownership, platform options, launch, post-launch setup, monthly care and what to do when something breaks. | 2.5 | ₦12,500 |
| 2 | **Website Planning Brief** | Editable DOCX | A fill-in brief covering goals, audience, pages, content, brand, features and budget, ready to give to a | 1.5 | ₦7,500 |

| # | File | Format | What is inside | Hours | Est. value |
|---|---|---|---|---|---|
| | | | designer. | | |
| 3 | **Launch, Care and Accounts Workbook** | XLSX spreadsheet | A launch-day tracker, a monthly care log and an account inventory with renewal dates and automatic days-remaining counts. | 1.5 | ₦7,500 |
| 4 | **Hiring a Web Designer: Questions and Red Flags** | PDF + editable DOCX | Twenty-five questions to ask, red flags to watch for, and a table to compare up to three quotes. | 1 | ₦5,000 |
| | **Total** | | | 6.5 | ₦32,500 |

*Estimated replacement cost ₦32,500 = 6.5 hours × ₦5,000 per hour. This is our estimate of the hours an independent professional would need to research, write and format these items. It is not a previous selling price.*

### How to use it

1. Read the handbook (about 30 minutes).
2. Complete the website brief.
3. Set up the account inventory in the workbook. Record who owns each account.
4. Use the quote questions if you are hiring.
5. Work through the launch tracker before going live.
6. Do the monthly care routine on the first of each month.

### What it does not do

- It is a guide and set of tools. It does not build, host or maintain a website.
- Domain, hosting, builder and email costs are separate and depend on providers. Prices and plans

change, so check current terms.

- It is not legal, tax or data-protection advice. Check your obligations, including Nigerian data-protection requirements, with a qualified professional.
- If you want Easywurld to build or maintain your site, that is a separate paid project with a written quote.

### Questions people actually ask

**Does this include a website?**

No. It helps you plan, brief, launch and maintain one. Easywurld builds sites as separate paid projects. Message us for a range.

**Which website builder do you recommend?**

The handbook compares categories (website builders, WordPress, custom or static) by who each suits, without promoting a brand, so you can choose using your needs and budget.

**Can I use it if I already have a site?**

Yes. The care routine, account inventory and ownership checklist are especially useful for existing sites.

**What does it cost beyond ₦5,000?**

A domain and hosting or a builder subscription, usually yearly or monthly. The handbook explains what each is for so you do not overpay or buy duplicates.

**Will it help me deal with a developer?**

Yes. The brief and the quote-comparison checklist are designed for that. They help you ask clear questions and spot red flags.

# Order slip

Nine packs. ~~₦5,000~~ each. One message away.

| # | Pack | Message this keyword | Est. value |
|---|---|---|---|
| 1 | **The Chat-to-Customer Playbook** | `PLAYBOOK` | ~~₦35,000~~ |
